HEYGEN

DESCRIPTION[1]

Heygen is a US-based platform that converts text into a video where a realistic avatar speaks the provided text.

FEATURES[1]

- Realistic avatars: Animate human characters to speak the text.
- Advanced speech synthesis: Converts text into natural and expressive speech.
- Multilingual: Ability to generate videos in multiple languages.

EXAMPLE OF USE[2]

A French teacher uses Heygen to create a video where an avatar plays Molière and explains in the first person the importance of theatre in the 17th century. Students watch the video and then discuss the impact of his works.

PRACTICAL TIPS[2]

- Check pronunciation and fluency before sharing the video.
