HOW TO GENERATE THE STATIC WEB PAGES

Using GitHub pages, it is possible to generate static web pages and consult all the resources of the Mooc using a web browser. On your GitHub project page, you can display the predefined address of the static web pages as[YOURNAME[.GitHub.io/ai4t/]

It take time (several minutes) for the task to be completed. Then there is a time lag with the generation of static web pages, so you have to wait a little before you can view them on **YOURNAME.GitHub.io/ai4t/**.

These instructions are a very simplified presentation of how to view Gitbub pages. For more details, consult the official git documentation: https://pages.GitHub.com/
