

1- CREATE AN ACCOUNT ON GITHUB

The preliminary step is to create an account on GitHub (it's free) if you do not already have one.

Ģ	Already have an account? Sign in →
	Welcome to GitHub! Let's begin the adventure
	Enter your email* → Continue
	By creating an account, you agree to the Terms of Service. For more information about GitHub's privacy

Creating an account ob github.

Access to the sign up page on GitHub

2- ACCESS THE GITHUB REPOSITORY OF THE PROJECT AI4T

Address of the GitHub repository of the AI4T project: https://GitHub.com/inrialearninglab/ai4t

3- CREATE A FORK OF THE REPOSITORY

A fork is an extensive copy of elements (from contents to commands) of the GitHub repository but it is detached from the **main**.

Therefore you can do whatever you want in it without impacting the AI4T Mooc. However if you want to keep up with evolution in the **main**, you can **synchronise** your fork whenever you want

Creating a fork on github.

Once created, the fork has to be named.

A fork is a co	a new fork opp of a repository. Forking a repository allows you to freely experiment with changes without
	e original project. View existing forks. Ids are marked with an asterisk (*).
Owner * Choose an By default, fo distinguish it Description	orks are named the same as their upstream repository. You can customize the name to t further.
	e main branch only e back to benedictecardon/ai4t by adding your own branch. Learn more.

Naming a fork on github.

We encourage you to:

- 1 : Choose the right name for your account
- 2 : Keep AI4T in the repository name
- 3 : And to add as description the new target language you are developing

Remember : It's always possible to keep up with the evolution of the initial GitHub repository by "sychronising" you own repository with the AI4T one.
